PROFESSIONAL SUMMARY

MS Applied Computer Science student (GPA 3.9) with hands-on experience in cloud infrastructure, containerization, and CI/CD automation across AWS and GCP. Skilled in Docker, Kubernetes, Terraform, and Python/Bash scripting to build, deploy, and operate scalable, secure, and automated systems. AWS Certified Developer and Google Certified Cloud Architect seeking Cloud Infrastructure and DevOps engineering roles.

EDUCATION

Northwest Missouri State University

2025 – 2026

Master of Science, Applied Computer Science | GPA: 3.9

KL University

2020 – 2024

Bachelor of Technology, Computer Science | GPA: 8.5

Specialization: Data Science and Big Data Analytics

WORK EXPERIENCE

Graduate Assistant – Mobile Computing (iOS)

2025 – 2026

Northwest Missouri State University, Maryville, MO

- Assisted faculty in delivering Mobile Computing (iOS) coursework, supporting 30+ students with Swift, Xcode, and iOS app development concepts through lab sessions and office hours.
- Evaluated assignments and projects, providing structured feedback on iOS architecture, UIKit, and SwiftUI patterns to reinforce best practices in mobile development.
- Collaborated with faculty to develop course materials and hands-on coding examples covering iOS app lifecycle, REST API integration, and UI component design.

Data Analytics Intern – AICTE Virtual Internship

Jun 2023 – Aug 2023

AICTE, Remote

- Analyzed large-scale datasets using Python (Pandas, NumPy) and SQL to uncover trends and deliver actionable insights, reducing data processing time by 30%.
- Built interactive dashboards and data visualizations using Matplotlib and Seaborn to communicate findings to non-technical stakeholders, supporting data-driven decision-making.
- Applied supervised ML models (regression, classification) to real-world datasets, achieving 87% model accuracy and presenting results through structured project reports.

PROJECTS

Containerized FastAPI Microservice on Kubernetes – Docker, Kubernetes, FastAPI, PostgreSQL, AWS 2026

- Containerized a FastAPI + PostgreSQL application using multi-stage Docker builds and distroless base images, shrinking image size and reducing the production attack surface.
- Authored Kubernetes manifests — Deployments, Services (ClusterIP/NodePort), and PersistentVolumeClaims — to orchestrate the API and database with persistent storage and stable in-cluster networking via CoreDNS.
- Deployed and validated workloads on a minikube cluster, debugging CrashLoopBackOff and image-pull failures through kubectl logs/describe and an iterative rebuild→push→rollout workflow.
- Provisioned a multi-node Kubernetes cluster on AWS EC2 with kops, backed by an S3 state store, to practice production-grade cluster bootstrapping and lifecycle management.

CodeRepoReader – GitHub Models API, Flask, Python 2025

- Built an AI-powered web tool enabling natural language Q&A over any GitHub repository or ZIP file, eliminating the need for manual git navigation.
- Implemented deep static analysis using Python AST parsing and regex-based techniques for JS, Java, and C# files to detect architecture patterns, entry points, and code quality issues.

- Integrated GitHub Models API (GPT-4o, GPT-4o Mini, Llama 3.1 70B) with Flask and Server-Sent Events (SSE) for real-time streaming responses, supporting uploads up to 100 MB.
- Built resilient rate-limiting logic with exponential backoff, ensuring reliable uptime across multi-model API calls.

MultiMed-Fusion – *React.js, Django, MongoDB, Gemini AI 2025*

- Developed a full-stack medical data analysis platform unifying lab reports, medical images, and audio notes, generating AI-powered summaries for healthcare professionals.
- Built multi-format ingestion pipelines (PDF, high-res images, audio) with Tesseract OCR and audio transcription, reducing manual data entry effort across 3+ data modalities.
- Implemented automatic patient data anonymization, JWT authentication, and RBAC to ensure HIPAA-aligned data privacy and access control.
- Integrated a RAG pipeline using Gemini LLM and vector embeddings for natural language querying with cited source links, improving information retrieval accuracy.

ServiceVerse – *Django, ReactJS, MySQL 2023*

- Partnered with a 3-person team to build a full-stack service aggregator platform connecting users with home service providers.
- Designed a user-friendly interface for browsing services, booking appointments, and managing providers, improving the end-to-end booking workflow.
- Architected RESTful APIs with a Django backend and ReactJS frontend, enabling seamless real-time data flow and a responsive user experience.

SKILLS

Programming Languages: Python, Java, JavaScript, Bash, SQL

Frontend: ReactJS, HTML5, CSS3

Backend: Django, Flask, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Infrastructure: AWS (EC2, EKS, S3, CloudFront, Route 53, VPC), Google Cloud Platform

DevOps & Containers: Docker, Kubernetes (minikube, kops, EKS), Terraform, GitHub Actions, CI/CD, Prometheus, Grafana, Git

AI / ML: Gemini LLM, OpenAI SDK, RAG Pipelines, Vector Embeddings, Prompt Engineering, Agentic Workflows

CERTIFICATIONS

- AWS Certified Developer – Associate
- AWS Certified Cloud Practitioner
- Red Hat Certified Enterprise Application Developer
- Google Professional Cloud Architect
