Cloud Engineer / DevOps / Platform Engineer

PROFESSIONAL SUMMARY

MS in Applied Computer Science candidate with hands-on experience designing, provisioning, and operating cloud infrastructure on AWS. Skilled in architecting scalable, highly available workloads across EC2, ECS/Fargate, EKS, VPC, and Route 53, with strong Infrastructure as Code (Terraform), cloud networking, and CI/CD automation in Python and Bash. Experienced in multi-region and disaster-recovery design, secrets management, auto-scaling, and cost-aware, Well-Architected solutions, with monitoring and observability via CloudWatch, Prometheus, and Grafana. AWS Certified Developer – Associate and Google Professional Cloud Architect seeking Cloud Engineer, DevOps Engineer, or Platform Engineer roles.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, ECS/Fargate, EKS, Lambda, S3, VPC, IAM, Route 53, CloudFront, ELB/ALB, Auto Scaling, CloudWatch), Google Cloud Platform
- **Cloud Architecture:** high availability, disaster recovery, multi-region design, auto-scaling, cost optimization, Well-Architected Framework, cloud migration, serverless
- **Containers & Orchestration:** Docker, Kubernetes, Amazon EKS, Helm, kubectl
- **IaC Tools:** Terraform, HashiCorp Vault, remote state, modular provisioning
- **CI/CD & Automation:** GitHub Actions, GitLab CI, Jenkins, Git, automated deployments, rollbacks
- **Monitoring & Observability:** Prometheus, Grafana, PromQL, Alertmanager, logging, alerting, dashboards
- **Programming & Scripting:** Python, Bash, SQL, Java, JavaScript
- **Backend & Databases:** Flask, Django, REST APIs, PostgreSQL, MySQL, MongoDB
- **Operating Systems:** Linux (Ubuntu), macOS

CERTIFICATIONS

- AWS Certified Developer – Associate
- AWS Certified Cloud Practitioner
- Google Professional Cloud Architect
- Red Hat Certified Enterprise Application Developer

PROFESSIONAL EXPERIENCE

Northwest Missouri State University, Maryville, MO

2025 – 2026

Graduate Assistant – Mobile Computing (iOS)

- Supported 30+ students in Mobile Computing (iOS) coursework covering Swift, Xcode, and iOS app development through lab sessions and office hours.
- Evaluated assignments and projects, providing structured feedback on iOS architecture, UIKit, and SwiftUI patterns to reinforce engineering best practices.
- Collaborated with faculty to develop course materials and coding examples covering app lifecycle, REST API integration, and UI component design.

AICTE Virtual Internship, Remote

Jun 2023 – Aug 2023

Data Analytics Intern

- Analyzed large-scale datasets using Python (Pandas, NumPy) and SQL to uncover trends and deliver insights, reducing data processing time by 30%.
- Built interactive dashboards with Matplotlib and Seaborn to communicate findings to non-technical stakeholders, supporting data-driven decisions.
- Applied supervised ML models (regression, classification) to real-world datasets, achieving 87% model accuracy across structured project reports.

PROJECTS

Resilient Multi-Region ECS Platform | Amazon ECS/Fargate, Terraform, CodePipeline, GitLab CI, CloudWatch, Grafana 2026

- Architected a multi-region, highly available platform on Amazon ECS Fargate with cross-region disaster-recovery failover, designing for resilience, scalability, and defined RTO/RPO objectives.
- Provisioned all infrastructure as modular Terraform (IaC) — VPCs, subnets, ALB, ECS services, and IAM roles — enabling repeatable, version-controlled, multi-environment deployments.
- Automated build and release with AWS CodePipeline and GitLab CI, and instrumented CloudWatch, Prometheus, and Grafana for cross-region metrics, alerting, and dashboards.
- Applied Well-Architected principles for cost optimization, security, and operational excellence; validated auto-scaling and failover behavior under load to root cause.

Containerized FastAPI Microservice on Kubernetes | *Docker, Kubernetes, Terraform, HashiCorp Vault, AWS* [Github](#) /2026

- Containerized a FastAPI + PostgreSQL service with multi-stage Docker builds and deployed to Kubernetes, authoring Deployment, Service, and PersistentVolumeClaim manifests for scalable orchestration.
- Provisioned AWS EC2 infrastructure with modular Terraform (IaC) and integrated HashiCorp Vault (AppRole) to inject secrets dynamically, keeping credentials out of source code and Terraform state.
- Debugged CrashLoopBackOff and image-pull failures through kubectl logs and describe; bootstrapped a multi-node cluster with kops backed by S3 remote state.

EKS Ingress with AWS Load Balancer Controller | *Amazon EKS, ALB, Helm, IAM/IRSA* 2026

- Provisioned an Amazon EKS cluster with eksctl and deployed a multi-replica workload behind an Application Load Balancer using the AWS Load Balancer Controller.
- Configured IAM Roles for Service Accounts (IRSA) with OIDC provider integration for least-privilege pod access to AWS APIs.
- Authored Namespace, Deployment, Service, and Ingress manifests; resolved OIDC, region, and target-group health-check issues to ship a working public endpoint.
- Deployed kube-prometheus-stack via Helm for cluster monitoring, building Prometheus metrics collection and Grafana dashboards for observability.

CodeRepoReader | *GitHub Models API, Flask, Python* 2025

- Built an AI-powered tool enabling natural-language Q&A over any GitHub repository or ZIP file, with deep static analysis via Python AST parsing.
- Integrated the GitHub Models API with Flask and Server-Sent Events for real-time streaming responses, supporting uploads up to 100 MB.
- Implemented resilient rate-limiting with exponential backoff to ensure reliable uptime across multi-model API calls.

EDUCATION

Northwest Missouri State University, Maryville, MO 2025 – 2026

Master of Science, Applied Computer Science | GPA: 3.9

KL University, India 2020 – 2024

Bachelor of Technology, Computer Science (Data Science & Big Data Analytics) | GPA: 8.5
